

Why Internet Explorer 8 cannot display the Web trading properly?

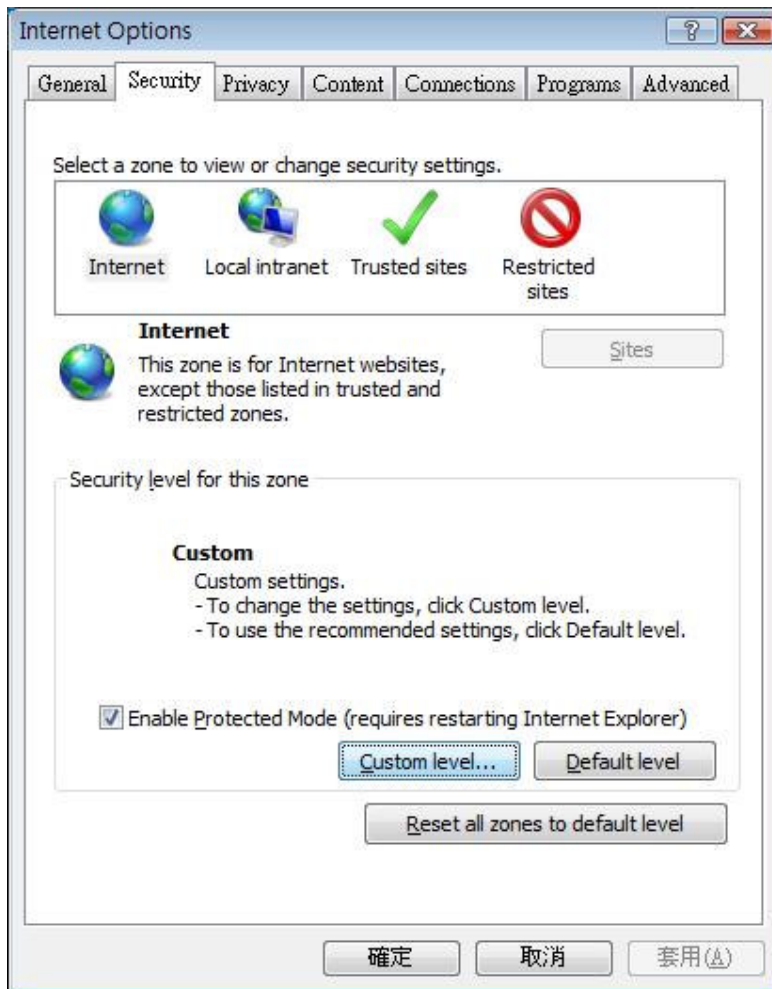

Suggest solutions :

Method 1

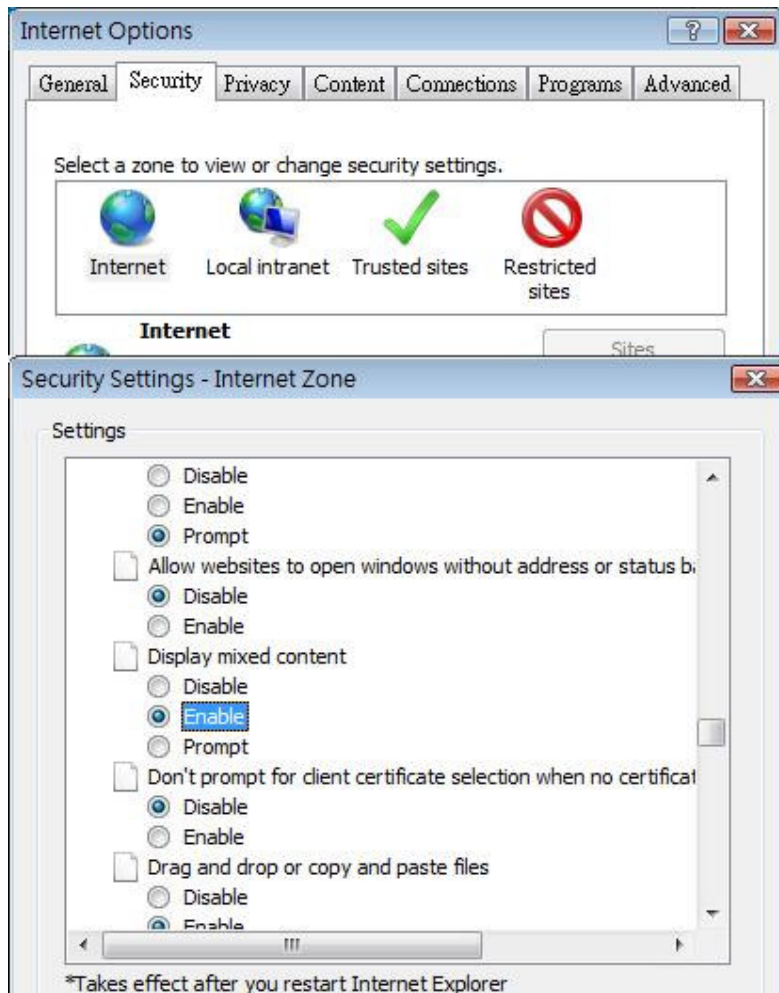

1. Start Internet Explorer, click “Tools > Internet Options”

2. On "Security" tab, click "Custom Level"

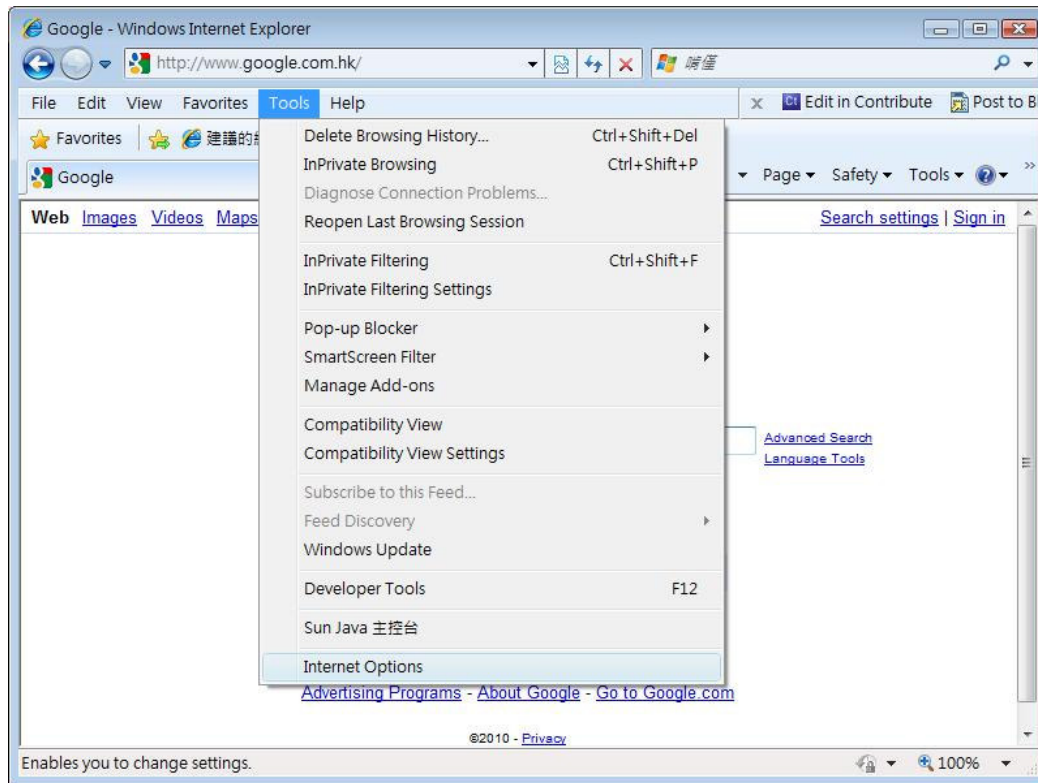

3. Under “Miscellaneous” category, select “Enable” Display mixed content.

4. Click “Refresh” and the web page should display properly.

Method 2

1. Start Internet Explorer, click "Tools > Internet Options"

2. On "Advanced" tab, under "Security" category, un-tick "Enable memory protection to help mitigate online attacks". Click "OK" and restart internet browser.
